### 1.1.2 Annual Fee in connection with the Austrian Energy Efficiency Law (EEffG)

On the basis of fig. 3.12 of the ECC Clearing Conditions and as specified hereinafter ECC charges an annual fee as a compensation payment for the increased administration costs in connection with the EEffG. The annual fee is only charged for trading participants who registered with ECC as energy end consumers in terms of the EEffG according to fig. 3.12 par. (1) of the ECC Clearing Conditions.

### 1.1.3 Technical Fees

The technical fees are charged by ECC for the technical access (data lines) to the clearing and settlement system.

### 1.1.4 Clearing Fees

The Clearing Fees depend either on the executed volume in Megawatt hours (MWh), therms (thm), million British thermal units (MMBtu), kilo tonnes of carbon dioxide (ktCO<sub>2</sub>), metric tons (t), short tons (st) or days (d) respectively, or on the number of Capacity Guarantee (CG), Guarantees of Origin (GO) traded or contracts concluded (Contract). Invoicing regarding the value of the commodities settled is effected through EnCC. ECC provides services in connection with the financial settlement of transactions (collection and crediting of the values of the commodities, including the value-added tax charged by PXE or by the counterparty commissioned by PXE).

Connection fees are due quarterly in advance. The connection fee is due from the time the order for connection is placed and not from the time admission is granted. For the first quarterly connection fee, the following rule shall apply: If the order is placed no later than on the 15<sup>th</sup> day of the month, fees are due for the entire month. If the order is placed after the 15<sup>th</sup> day of the month, fees are only due starting on the first day of the following month.

Annual fees for Institution Clearing Members and DCP Clearing Members are due annually in advance. Annual fees are charged from the start of the month that follows the issue of a clearing licence or the DCP Clearing licence, respectively.

<sup>2</sup> This is amongst others also explicitly valid for costs, apportionments, compensation amounts or any other expenditures resulting from the Austrian Energy Efficiency law (Bundes-Energieeffizienzgesetz - EEffG).

Termination of Clearing Membership is governed by the Clearing Conditions. Annual fees for Institution Clearing Members and DCP Clearing Members are refunded pro-rata only for entire months that have not yet started.

### 1.5 Value Added Tax (VAT)

For eligible margin assets in the form of securities or book-entry securities (Wertrechte) delivered as cover, a fee will be charged daily in the amount of 0.15 % p.a. The calculation of the fee will be performed act / 360 based on the value of the eligible margin assets in EUR in the form of securities or book-entry securities (Wertrechte) delivered to cover margin requirements which are entered on the internal collateral accounts of the Institution Clearing Member.

Therefore, eligible margin assets in the form of securities or book-entry securities (Wertrechte) entered on the margin accounts whose delivery is not required to cover margin requirements, are not part of the calculation.

The Add-on will be charged daily.

For the calculation of the Add-on on the service fee for margin assets in the form of securities or book-entry securities (Wertrechte) the provisions of this section apply mutatis mutandis.

ECC will publish information on the interest rate and the interest period applied on its website. Interest rate and interest period may be amended from time to time. Any amendments will be published accordingly.
